

School ERP - UI PRD

Let me analyze the existing frontend codebase first.

Good, I have a thorough picture of what exists. Now writing the UI flow document.

SCHOOL ERP — UI FLOW & SCREEN REQUIREMENTS

Frontend User Experience Document — Phase 1 This document covers every screen, user action, and navigation flow. No technical implementation details.

PART A — OVERALL NAVIGATION STRUCTURE

A.1 Application Shell

The application has two distinct shells:

Public shell (no sidebar, no header): Used for all login and password-related screens.

Authenticated shell (with sidebar + header): Used for all post-login screens.

A.2 Sidebar Navigation

The sidebar is always visible once logged in. It contains grouped navigation links:

1	SCHOOL
2	├── Dashboard
3	├── Students
4	└── Admissions
5	
6	ACADEMICS
7	├── Academic Years
8	├── Classes & Sections
9	└── Fee Heads
10	
11	FEE MANAGEMENT
12	├── Fee Structure (Class-level)
13	├── Student Fee Setup
14	└── Fee Dues
15	
16	PAYMENTS
17	├── Collect Fee
18	├── Invoices
19	└── Refunds
20	
21	SCHOLARSHIPS
22	├── Schemes
23	└── Requests
24	
25	REPORTS
26	└── Reports
27	

```
28 ADMINISTRATION
29   └─ Users
30   └─ School Settings
31
32 [Notification Bell] ← top-right header
33 [User avatar + name] ← top-right header, click → Settings / Logout
34
```

Sidebar items visible to a user depend on their role. Restricted items are hidden, not greyed out.

A.3 Header

Persistent header bar at the top:

- School name and logo (left)
- Notification bell icon with unread count badge (right)
- User avatar with name and role label (right); clicking opens a small dropdown: "Settings" and "Logout"

A.4 Session Expiry Warning

When the user's session has 5 minutes remaining, a banner appears at the top of every screen: *"Your session expires in 5 minutes. Click to extend."* Clicking calls the refresh endpoint. If session expires without extension, user is redirected to login; after logging back in, they are returned to the page they were on.

PART B — AUTHENTICATION FLOWS

B.1 Login

Screen: Full-page two-panel layout. Left panel: school branding. Right panel: login form.

What the user does:

1. Enters their username and password
2. Clicks "Login"
3. If credentials are valid → lands on Dashboard
4. If account is inactive → sees error: "Your account has been deactivated. Contact your administrator."
5. If wrong credentials → sees error: "Incorrect username or password."

Existing flow covers this. Changes needed:

- Login field must accept **username** (not email or phone — current code uses email/phone)
- Remove OTP step from login — this is not in scope for Phase 1

B.2 Forgot Password

User journey:

1. On login screen, clicks "Forgot password?"
2. Enters their username → clicks "Send Reset Link"
3. Screen shows: "If this username exists, a reset link has been sent to the registered email."
4. User opens email → clicks reset link → lands on Reset Password screen
5. Enters new password + confirm password → clicks "Reset Password"
6. Success message shown → link to go back to Login

B.3 First Login — Forced Password Change

User journey:

1. First time a user logs in with a system-assigned password, they are automatically redirected to the Change Password screen
2. They enter their current (temporary) password and a new password
3. After saving, they land on Dashboard

B.4 Change Password (from Settings)

User journey:

1. User is logged in, clicks their avatar → "Settings"
 2. On Settings page, clicks "Security" tab
 3. Enters current password, new password, confirm new password
 4. Clicks "Update Password" → sees success message
-

PART C — SCHOOL SETUP WIZARD

Shown only to OWNER on first login. Until setup is complete, all other screens show a blocker.

C.1 Setup Blocker

If school setup is not complete, every screen (including Dashboard) shows a full-screen overlay: "Welcome! Please complete your school setup to get started." with a single button: "Begin Setup". No other navigation is accessible.

C.2 Setup Flow (4 steps)

Step 1 — School Profile

User fills in:

- School name (required)
- Address (required)
- Contact email and phone (required)
- Logo upload — drag-and-drop or click to browse; shows preview after upload (optional, max 2MB, PNG/JPG)
- Affiliation number (optional)

Clicks "Next."

Step 2 — Term Configuration

User sees 3 term rows (Terms cannot be added or removed — always exactly 3):

Term	Name	Due Date	Split %
Term 1	[editable]	[date picker]	[%]
Term 2	[editable]	[date picker]	[%]
Term 3	[editable]	[date picker]	[%]

- Name: editable text (e.g., "First Term", "Term 1", "April–July")
- Due date: approximate date when fees are due (used in reports)
- Split %: must sum to exactly 100

A live counter at the bottom shows the current sum: "Total: 100% ✓" or "Total: 95% — must equal 100%."

Warning banner: *"Term configuration cannot be changed after students are admitted. Please review carefully."*

Clicks "Next."

Step 3 — Number Sequences

Three rows, one per sequence type:

Type	Prefix	Starting Number
Admission Numbers	[text input]	[number input]
Receipt Numbers	[text input]	[number input]
Invoice Numbers	[text input]	[number input]

Live preview shown: e.g., *"Admission numbers will look like: SAV00001, SAV00002..."*

Clicks "Next."

Step 4 — Create First Admin User

User fills in:

- Full name
- Username
- Email
- Phone
- Password + Confirm password

Clicks "Complete Setup."

On success: Setup overlay removed. User lands on Dashboard. A success toast: *"School setup complete. Welcome to [School Name]!"*

PART D — DASHBOARD

D.1 Dashboard Screen

The dashboard is the landing page after login. Content varies by role.

Visible to all roles:

- Total active students (current academic year)
- Pending scholarship requests count (click → Scholarship Requests page)
- Pending refunds count (click → Refunds page)
- Quick action buttons: "Admit New Student" and "Collect Fee"
- Recent payments list (last 5) — each row shows: receipt number, student name, amount, date

Visible to OWNER and PRINCIPAL only:

- Today's collection (₹ amount)
- Month-to-date collection (₹ amount)
- Total outstanding dues (₹ amount + count of students)

Visible to ACCOUNTANT:

- Today's collection (₹ amount)
- Total outstanding dues (₹ amount + count of students)

- Month-to-date collection is NOT shown

ADMIN sees: Student count, pending scholarship requests, pending refunds, quick actions only. No financial amounts.

Clicking "Admit New Student" → navigates to Admissions. Clicking "Collect Fee" → navigates to Collect Fee screen.

PART E — SCHOOL SETTINGS

E.1 School Settings Page

Access: Sidebar → School Settings (OWNER and ADMIN only)

Tabbed interface:

Tab: School Profile

- Displays current school name, address, contact email, phone, affiliation number
- All fields are editable inline
- Logo: shows current logo with "Change Logo" button (opens file picker; preview before save)
- Save button at bottom; success toast on save

Tab: Term Configuration

- Shows the 3 configured terms with their names, due dates, and split percentages
- Fields are editable
- Warning shown if students have already been admitted: *"Changing term configuration after admission may affect existing fee structures. Proceed carefully."*
- Save button; success toast on save

Tab: Number Sequences

- Shows current prefix and next number for Admission, Receipt, Invoice
 - Prefix is editable; starting number is read-only once any number has been issued
 - If no numbers issued yet: both prefix and starting number are editable
 - Save button; success toast on save
-

PART F — ACADEMIC SETUP

F.1 Academic Years

Access: Sidebar → Academic Years

Screen layout:

- Page header: "Academic Years" + "Add Academic Year" button
- Table: columns — Name, Start Date, End Date, Status (Active/Inactive), Current Year badge, Actions (Edit, Deactivate)

Add / Edit Academic Year:

- Opens a modal with fields: Name, Start Date, End Date, "Set as Current Year" toggle
- Setting as current year shows warning: *"This will unset the current academic year designation from [previous year name]."*
- Save button

Deactivate:

- Clicking Deactivate shows a confirmation modal: *"Are you sure you want to deactivate [Year Name]? This will hide it from dropdowns."*
- Deactivated years are shown greyed out in the table; can be reactivated

F.2 Classes & Sections

Access: Sidebar → Classes & Sections

Screen layout:

- Two-panel layout (or two tab sections): Classes list on the left, Sections panel on the right

Classes panel:

- List of classes with their display order
- "Add Class" button → modal with fields: Class Name, Display Order
- Row actions: Edit (opens same modal), Deactivate

Sections panel:

- Dropdown to select which class to view sections for
- List of sections for that class
- "Add Section" button → modal with field: Section Name
- Row actions: Edit, Deactivate

F.3 Fee Heads

Access: Sidebar → Fee Heads

Screen layout:

- Table: columns — Fee Head Name, Description, Active status, Actions (Edit, Deactivate)
- "Add Fee Head" button

Add / Edit Fee Head:

- Modal with fields: Name (required), Description (optional)
 - Cannot deactivate a fee head that is used in an active class fee structure (shows error if attempted)
-

PART G — USER MANAGEMENT

G.1 Users List

Access: Sidebar → Users (OWNER and ADMIN only)

Screen layout:

- Table: columns — Name, Username, Email, Role, Status (Active/Inactive), Actions (Edit, Deactivate)
- "Add User" button

G.2 Add / Edit User

Clicking "Add User" or "Edit" opens a full-page form (not a modal, given the number of fields):

- Full Name (required)
- Username (required; must be unique; shown as read-only in edit mode)
- Email (required)
- Phone (required)
- Role (required): OWNER, ADMIN, PRINCIPAL, ACCOUNTANT — shown as radio buttons with role descriptions
- Password + Confirm Password (required for create; not shown for edit — separate "Reset Password" link shown instead)

OWNER cannot change their own role. Cannot deactivate your own account.

Role descriptions shown on screen:

- **Owner:** Full access to everything
- **Admin:** School operations — everything except scholarship approval and financial reports
- **Principal:** Can do everything Accountant can, plus approve/reject scholarship requests
- **Accountant:** Student management, fee collection, create and edit scholarship requests

G.3 Deactivate User

Confirmation modal: *"Deactivate [User Name]? They will no longer be able to log in."*

PART H — STUDENT MANAGEMENT

H.1 Student List

Access: Sidebar → Students

Screen layout:

- Filter toolbar: Search by name or admission number, Class dropdown, Section dropdown, Academic Year dropdown, Status dropdown (Active / Discontinued / All)
- "Admit New Student" button + "Bulk Upload" button
- Table: columns — Admission No, Student Name, Class, Section, Academic Year, Guardian Phone, Fee Status, Actions
- Fee Status shown as a badge: UP TO DATE / DUES PENDING / NOT SETUP
- Pagination at the bottom

Clicking a student row → Student Detail page

H.2 Student Detail Page

Access: Click any student from the student list

Layout: Student header (name, admission number, class, section, status badge) with tabs below:

Tab: Personal Info

- All student details: name, DOB, gender, address, blood group, religion, community
- Father info: name, phone, email, occupation
- Mother info: name, phone, email, occupation
- Admission date, previous school
- "Edit" button → opens edit mode inline (all fields become editable); "Save" and "Cancel" buttons appear

Tab: Fee & Payments

- See Section H.5 (Fee Ledger View)

Tab: Scholarship

- See Section I.3 (Scholarship per student)

Tab: History

- Class/section transfer history: table of past class assignments
- Shows: Academic Year, Class, Section, Assigned Date

H.3 Admission Wizard

Access: "Admit New Student" button on Student List or Dashboard

Step 0 — Setup Modal (gate before wizard opens)

- Modal asking: Academic Year (dropdown) + Class (dropdown) + Section (dropdown)
- Cannot proceed without selecting all three
- "Begin Admission" button opens the 3-step wizard

Step 1 — Student Information

Fields:

- First Name, Last Name (required)
- Date of Birth (required; date picker)
- Gender (required; Male/Female/Other — radio)
- Blood Group (dropdown; optional)
- Nationality (dropdown; optional)
- Religion, Community (dropdowns; optional)
- Address (required; textarea)
- Previous School (optional)
- Admission Date (required; defaults to today)

Step 2 — Parent / Guardian Information

Father's details:

- Full Name (required), Phone (required), Email (optional), Occupation (optional)

Mother's details:

- Full Name (required), Phone (required), Email (optional), Occupation (optional)

Step 3 — Review & Submit

Shows a summary of all entered data in read-only cards. User can click "Edit" on each card to jump back to that step.

"Submit Admission" button at the bottom.

On success:

- Full-screen success popup showing the assigned Admission Number (e.g., SAV00042)
- Options: "Admit Another Student" (resets wizard) or "View Student Profile"

Navigation within wizard:

- Step indicator at the top shows Step 1 / 2 / 3 and completion status
- "Back" and "Next" buttons at the bottom
- Clicking a completed step in the indicator jumps to that step
- Cannot skip a step unless current step is valid
- "Change Class" link in the header allows going back to Step 0 setup modal

H.4 Edit Student

From Student Detail → Personal Info tab → "Edit" button:

- All fields become editable inline
- Class and section can be changed here (this counts as a section/class transfer — a history record is created)
- "Save Changes" and "Cancel" buttons
- Saving shows success toast

Discontinue Student:

- "Discontinue Student" button (shown to OWNER, ADMIN, PRINCIPAL only; red, destructive button)
- Opens confirmation modal: *"Mark [Student Name] as discontinued? Their outstanding fees will remain collectible."*
- Input field: "Reason for discontinuation" (optional)
- Confirm → student status changes to DISCONTINUED; they move to "Discontinued" filter in the list

H.5 Section Transfer

Section transfer is handled within the student edit flow (same as Edit Student above). When the user changes the section and saves, the system records the transfer in history.

No separate "Transfer" flow needed.

H.6 Bulk Upload Students

Access: "Bulk Upload" button on Student List

Screen layout:

1. Download template row: "Download the student import template" + "Download Template" button
2. Upload zone: Drag-and-drop area or "Browse Files" button; accepts Excel files only
3. After file selection: file name shown with "Upload" button

After upload:

- If all rows succeed: green success banner with count; table shows all admitted students
 - If some rows fail: amber warning banner "48 of 50 students uploaded successfully. 2 rows had errors."
 - Error detail table shows: Row Number, Student Name (if available), Error Reason
 - "Download Failed Rows" button to get a corrected template with only the failing rows
-

PART I — FEE CONFIGURATION

I.1 Class Fee Structure

Access: Sidebar → Fee Structure

Screen layout:

- Filter toolbar: Class (required), Academic Year (required) — table only loads when both are selected
- If no fee structure exists for selected class + year: "No fee structure set up. Click 'Configure' to begin."
- "Configure" button opens the configuration panel

Fee Structure Configuration panel (full-page or large panel):

Section A — Fee Lines:

- Table with columns: Fee Head (dropdown from configured fee heads), Annual Amount (₹ input)
- "Add Row" button to add more fee heads
- Trash icon on each row to remove

Section B — Term Split:

- 3 rows (one per term), each with term name (from school config) and % input
- Live total shown: must sum to 100
- "Use default (30/30/40)" helper link to auto-fill

Section C — Preview:

- Shown automatically as the user inputs data
- Table showing: Term 1 amounts per fee head, Term 2 amounts, Term 3 amounts, Annual total
- Term amounts are calculated as $\text{floor}(\text{annual} \times \%)$
- Last term absorbs rounding differences (shown with asterisk and note)

"Save Fee Structure" button at the bottom.

If a fee structure already exists for the selected class + year, it is shown pre-filled and can be edited.

I.2 Student Fee Setup

Access: Sidebar → Student Fee Setup (or from Student Detail → Fee tab → "Setup Fee Structure")

Screen layout:

- Student selector at the top: search by name or admission number
- Academic Year selector
- Once student and year are selected, the panel loads

Section A — Class Fee Structure Summary (read-only) Shows the class-level fee structure as a reference table.

Section B — Term Split Override

- Toggle: "Use class default term split (X%/Y%/Z%)" — checked by default
- If unchecked: 3 input fields appear for custom term split percentages; same validation as class-level (must sum to 100)

Section C — Additional Fees

- Table: Fee Head (dropdown), Annual Amount
- "Add Fee" button
- These fees are specific to this student only (e.g., transport, special coaching)
- Can be left empty

Section D — Preview

- Live preview table showing the resulting fee per term per fee head (including additional fees)
- Clearly differentiates class fees vs additional fees

Action buttons:

- "Save" — saves the configuration without generating ledgers
- "Save & Generate Ledger" — saves and creates the billing ledger + invoices for this student

"Save & Generate Ledger" shows a confirmation modal: *"This will generate billing records for all 3 terms. You cannot regenerate ledgers once created. Continue?"*

After generation: success message; "View Ledger" button navigates to the fee ledger view for this student.

If ledger already generated: "Ledger already generated on [date]." banner; only "Save" is available (to update additional fees or term split — but a warning notes this won't retroactively change already-generated ledger rows).

PART J — SCHOLARSHIP MANAGEMENT

J.1 Scholarship Schemes

Access: Sidebar → Scholarships → Schemes

Screen layout:

- Grid of scheme cards, each showing: Scheme Name, Discount Type badge (Percentage / Fixed Amount), Active/Inactive status
- "Add Scheme" button

Add / Edit Scheme: Opens a modal with fields:

- Scheme Name (required)
- Description (optional)
- Discount Type: "Percentage" or "Fixed Amount" (radio)

No other configuration needed at scheme level. Actual discount values are set per student at the request level.

Deactivate Scheme:

- Deactivate button on card → confirmation modal
- Cannot deactivate if any PENDING or APPROVED requests reference this scheme

J.2 Scholarship Requests List

Access: Sidebar → Scholarships → Requests

Screen layout:

- Filter toolbar: Status (All / Pending / Approved / Rejected / Superseded), Class, Academic Year, Search by student name
- Table: columns — Student Name, Class, Request Date, Status badge, Actions

Actions by status:

- PENDING: "View" and "Approve/Reject" (for Principal/Owner); "View" and "Edit" (for Accountant)
- APPROVED: "View"
- REJECTED: "View" and "Re-apply" (creates a new request)
- SUPERSEDED: "View" (read-only)

J.3 Scholarship — Student View

Access: Student Detail → Scholarship tab

This tab shows the scholarship status for this specific student:

If no request exists:

- Message: "No scholarship request has been submitted for this student."
- "Create Scholarship Request" button (for ACCOUNTANT and PRINCIPAL)

If request is PENDING:

- Yellow banner: "Scholarship request pending approval — fee collection is blocked for this student"
- Shows the request details (see below)
- "Edit Request" button (ACCOUNTANT/PRINCIPAL only)
- "Approve" and "Reject" buttons (PRINCIPAL/OWNER only)

If request is APPROVED:

- Green banner: "Scholarship active"
- Shows approved request details
- "Modify Scholarship" button → creates a new PENDING request alongside the existing approved one; user sees warning: *"A new request will be created. Fee collection will be blocked until the new request is reviewed."*

If a new PENDING request exists alongside an APPROVED one:

- Two cards shown: "Current Active Scholarship" (APPROVED) and "Pending Modification" (PENDING)

- Fee collection is blocked during this time

Request detail card shows:

- Request status + date submitted + submitted by
- Table of line items: Scheme Name | Fee Head | Discount % | Annual Discount Amount
- Total annual discount amount
- Remarks

J.4 Create / Edit Scholarship Request

Opens as a full-page form (given complexity):

Student info header (read-only): Name, Class, Admission No

Line items section:

- Table with columns: Scholarship Scheme (dropdown), Fee Head (dropdown), Discount % (number input)
- Each row shows a live calculated preview: "₹X off per year on [Fee Head]"
- "Add Line Item" button to add more rows
- Trash icon to remove a row

Remarks field (optional): free text

Summary section:

- Shows total discount per fee head and grand total annual discount

"Submit Request" button.

On submission: redirects to Student Detail → Scholarship tab; PENDING banner shown.

J.5 Approve / Reject Request

Access: From Scholarship Request list or Student Detail → Scholarship tab

Approve flow:

- "Approve" button → confirmation modal: *"Approve scholarship request for [Student Name]? This will apply discounts to their fee ledger."*
- Remarks field (optional)
- Confirm → status changes to APPROVED
- If refund is triggered (student already paid more than new net): toast: *"Approval successful. A refund of ₹[amount] has been created for this student."*

Reject flow:

- "Reject" button → modal with required Remarks field: *"Please enter a reason for rejection"*
 - Confirm → status changes to REJECTED
 - Accountant who submitted receives in-app notification
-

PART K — FEE COLLECTION & PAYMENTS

K.1 Fee Ledger — Student View

Access: Student Detail → "Fee & Payments" tab

Layout:

If ledger not yet generated:

- Message: "Fee structure has not been set up for this student for the current year."
- "Set Up Fee Structure" button → navigates to Student Fee Setup screen

If scholarship is PENDING:

- Red warning banner at the top: *"Fee collection is blocked — scholarship request #SR-XXXX is pending approval."*
- [View Scholarship Request →] link
- All "Collect Payment" buttons are disabled

Ledger section (3 collapsible term cards):

Each term card shows:

- Term header: Term name + total due for this term
- Table: Fee Head | Annual Amount | Term % | Term Amount | Scholarship Discount | Net Amount | Paid | Balance | Status

Status per row: PAID (green) / PARTIAL (amber) / UNPAID (red)

- "Collect Payment" button per term (disabled if scholarship pending)

Footer:

- Grand total row: Total annual | Total net | Total paid | Total outstanding
- "View Payment History" link

K.2 Collect Payment Modal

Trigger: "Collect Payment" button on any term card

Modal layout:

Section 1 — Select Fee Items Checkbox list of all unpaid/partial rows for all 3 terms. Pre-selects the term the button was clicked from. User can check/uncheck rows across all terms.

Per row shows: Term Name + Fee Head | Net Amount | Balance Due

Section 2 — Amount to Collect

- Auto-calculated total of checked rows' balances
- Editable amount field (user can enter less than the total → partial payment)
- Validation: cannot exceed total balance of selected rows

Section 3 — Payment Mode Breakdown

- Default: one row with mode = Cash and amount = collecting amount
- "Add Another Mode" button adds another row
- Each row: Mode dropdown (Cash/Cheque/DD/NEFT/UPI/Card) + Amount input
- Non-cash modes show a Reference Number field
- Validation: sum of all mode amounts must equal the total collecting amount

Section 4 — Payment Date & Remarks

- Payment Date: date picker, defaults to today
- Remarks: optional text field

Buttons: "Cancel" and "Confirm & Generate Receipt"

On confirm: Modal closes; receipt is shown inline (or in a new modal); ledger table refreshes.

K.3 Receipt View

Immediately after a successful payment, a receipt is shown in a print-ready modal format (see PRD for receipt layout).

Buttons: "Print Receipt" and "Download PDF."

The receipt can also be accessed any time from Payment History.

K.4 Payment History (per student)

Access: Student Detail → Fee & Payments tab → "View Payment History" link

Screen:

- Table: Receipt No | Date | Amount | Payment Modes | Term(s) Covered | Collected By | Actions

- "View Receipt" action on each row → opens receipt in a modal

K.5 Invoices

Access: Sidebar → Invoices

Screen:

- Filter toolbar: Student (search), Class, Academic Year, Term, Status (Unpaid/Partial/Paid/All)
- Table: Invoice No | Student Name | Class | Term | Total Amount | Paid | Balance | Status | Actions
- "View Invoice" action → opens invoice in a print-ready modal

Invoice modal: School header, student info, line-by-line fee breakdown, discount summary, totals, payment status, "Print" and "Download PDF" buttons.

K.6 Fee Dues Dashboard

Access: Sidebar → Fee Dues

Screen:

- Academic Year filter (defaults to current year)
- Class filter, Section filter, Term filter (All / Term 1 / Term 2 / Term 3)
- Table: Student Name | Admission No | Class | Section | Term 1 Due | Term 2 Due | Term 3 Due | Total Outstanding
- Clicking a student name → navigates to Student Detail → Fee tab
- "Export CSV" button

Summary row at the bottom: Total outstanding across filtered students.

K.7 Refunds

Access: Sidebar → Refunds

Screen:

- Filter: Status (Pending / Completed / All)
- Table: Student Name | Admission No | Class | Amount | Reason | Date Triggered | Status | Actions

Pending refunds:

- "Mark as Completed" action button

- Clicking opens a confirmation modal: *"Confirm that cash of ₹[amount] has been handed over to [Student Name]'s guardian."*
 - Optional remarks field
 - Confirm → status changes to COMPLETED; row moves to Completed filter
-

PART L — REPORTS

Access: Sidebar → Reports

Single page with 4 report sections as tabs or cards.

L.1 Fee Collection Summary

(Visible to OWNER and PRINCIPAL only — hidden from ADMIN and ACCOUNTANT)

Filters: Academic Year, Class (optional), Term (optional)

Table: Fee Head | Term Billed | Term Collected | Term Due

Summary: Total Billed | Total Collected | Collection %

Buttons: "Export CSV" and "Export PDF"

L.2 Student Strength

Filters: Academic Year

Table: Class | Section-wise counts | Class Total

Summary: Total Active | Total Discontinued | Grand Total

Button: "Export CSV"

L.3 Pending Dues

Filters: Academic Year, Class, Section

Table: Student Name | Admission No | Class | 0–30 days | 31–60 days | 61–90 days | 90+ days | Total Due

(Ageing buckets calculated from the term due dates configured in school settings)

Summary: Total Outstanding

Buttons: "Export CSV" and "Export PDF"

L.4 Payment Register

Filters: Date Range (From, To), Class

Table: Receipt No | Date | Student Name | Amount | Payment Modes

Summary: Total Collected in period | Mode-wise breakdown (Cash: X, UPI: Y, ...)

Buttons: "Export CSV" and "Export PDF"

PART M — NOTIFICATIONS

M.1 Notification Bell

The bell icon in the top-right header shows a count badge when unread notifications exist.

Clicking the bell opens a side panel (not a full page).

M.2 Notification Panel

- "Mark All Read" button at the top
- List of notifications, most recent first
- Each notification shows: Icon (based on type) + Message text + Relative timestamp ("2 hours ago")
- Unread notifications have a subtle highlighted background
- Clicking a notification marks it as read and navigates to the relevant screen if applicable:
 - Scholarship submission → Scholarship Requests list
 - Scholarship approved/rejected → Student's scholarship tab
 - Refund triggered → Refunds page

Notifications older than 30 days are not shown.

PART N — SETTINGS

Access: User avatar → "Settings"

N.1 Profile Tab

Read-only display of:

- Full name, Username, Email, Phone, Role, School Name

N.2 Security Tab

- Change Password form: Current Password, New Password, Confirm New Password

- Password strength indicator under the new password field
- "Update Password" button
- Success message shown inline on save

PART O — USER FLOW SUMMARY MAP

```

52 | Users → list → [Add/Edit/Deactivate user]
53 | School Settings → Profile | Terms | Number Sequences tabs
54 |
55 | NOTIFICATIONS
56 |   └ Bell icon → side panel → [click notification → navigate to
    |     context]
57 |
58 | SETTINGS
59 |   └ User avatar → Settings → Profile tab | Security tab (change
    |     password)
60 |

```

PART Q — KEY UX RULES

These apply across all screens:

1. **Destructive actions always require confirmation.** Deactivate, Discontinue, Delete, and Reject all open a confirmation modal before executing.
2. **Blocked states are visible, not hidden.** When a user doesn't have access to an action (e.g., Accountant cannot approve scholarships), the button is hidden. When a business rule blocks an action (e.g., scholarship pending), the button is visible but disabled with a tooltip explaining why.

3. **Empty states are instructive.** When a list is empty, show a message explaining why and what action to take (e.g., "No fee structure configured. Click 'Configure' to set one up.").
4. **Live calculation previews.** Fee structure configuration and scholarship request forms show live-calculated totals as the user types. No need to click a "Calculate" button.
5. **Filters persist within a session.** If a user filters the student list by "Class 8" and navigates away and back, the filter is still applied.
6. **Success feedback is always shown.** Every save/create/update/delete shows a toast notification confirming the action. Errors are shown inline near the relevant field or at the top of the form.
7. **Navigation is never blocked by unsaved changes without warning.** If a user has unsaved changes on a form and tries to navigate away, a browser-standard "You have unsaved changes. Leave anyway?" prompt appears.
8. **Paginated lists default to 20 items per page.** All tables show "Showing X–Y of Z results" text.
9. **Dates are always displayed in DD-Mon-YYYY format** (e.g., 28-May-2026). Date pickers accept keyboard input and calendar selection.
10. **Currency values are always shown with the ₹ symbol** and formatted with Indian-style comma grouping (1,24,600).

End of UI Flow Document — School ERP Phase 1 All flows reference the business rules and API details in the main PRD.
